EHIM believes in the overall wellness of our members by way of prevention. In addition to a healthy lifestyle, certain medication can help patients avoid many illnesses and conditions. The medication list below is not all inclusive, but does contain many options for chronic conditions, such as high blood pressure, high cholesterol, diabetes, asthma, osteoporosis, and heart disease. This list provides examples of your preventive medication by drug category/therapeutic classification. Any medication may be added to or removed from the list as determined by EHIMs clinical team.
